Introduction

Simplicity on a Plate

MealMate is a streamlined, web-based application designed to bring the fast-food counter to your digital screen.

Our system allows users to effortlessly browse a curated menu of popular items including burgers, pizzas, and sides. With an intuitive interface, users can customize their orders and instantly see their bill calculated in real-time.

Bright and delicious fast food spread with burgers and fries

Key Features

Categorized Menu

A well-structured menu divided into logical sections like Burgers, Pizzas, and Sides, making navigation seamless for hungry users.

Live Billing

Dynamic total calculation updates instantly as items are selected or unchecked, providing immediate price feedback without page reloads.

User Friendly

Built with a responsive design and includes convenient features like a "Reset Order" button to quickly start a new selection.

Technologies Used

🍔 HTML5

Provides the semantic structure and layout of the application.

🍔 CSS3

Handles the "MealMate" branding, responsive design, and visual styling.

🍔 JavaScript

Powers the interactive logic, including checkbox events and bill calculation.

❤️

Thank You!

For your time and attention.
